This ____ day of August, 2026

To Whom It May Concern,

I am glad to recommend Jeffery Ferguson – "Phoenix." We have collaborated for several years across a number of projects at the intersection of AI, strategy, and technology, and I list him as a collaborator on my own professional profile for good reason – his material and thinking have made their way into work I have shared with my own network, and at points into my own writing.

Jeffery drafted a technical CV and helped me think through positioning at a point when I needed an outside, capable perspective on how to present my own work – not a small thing to ask of someone, and he did it well. Beyond that, we have traded business-plan material, presentation work, and product concepts back and forth for years, the kind of ongoing exchange that only works when both sides trust the other's judgment.

Jeffery thinks broadly and connects ideas across domains in a way I have found genuinely useful, and he is reliable over the long haul. I recommend him.
